

WANTED

Reports of Turtles, Snakes, Lizards, Frogs, Toads & Salamanders

This map shows how well each of Vermont's towns has been surveyed for reptiles and amphibians. Volunteers are encouraged to contribute written reports, photographs, or tape recordings of any Vermont reptile or amphibian from any town.

Ring-necked Snake, one of eleven known species of snake in Vermont.

Gray Treefrog, one of eleven known species of frog in Vermont

Species Reported

	0 - 10	Minimal survey effort
	11 - 20	Moderate survey effort
	21 +	Most common and some unusual species reported

Your help is requested to fill in the many remaining gaps in our records. To contribute records or obtain more information visit our website at:
