

Vermont Reptile and Amphibian Report

Please fill out both sides of this report as completely as you can.

Species common name _____

Latin name _____

Date of sighting _____ State _____ County _____

Town _____ Specific location _____

Directions to the location _____

Describe the habitat (e.g., meadow, marsh, woods) _____

Who owns the land where this animal was found? _____

Good quality photographs or tapes allow others to verify your report. Include copies of them if at all possible. List the tapes and photographs which accompany this record. Be sure to label each tape or photograph.

How clearly did you see or hear it?

Please describe the background color and the shape and color of any markings on:

The back and sides.

The underside.

The head, face, and neck.

The legs and tail (if applicable).

Additional details are needed on the back of this sheet.

----> ----> ----> ----> ---->

Approximately how long and wide was the animal? You can estimate or compare with other common objects.

What other distinguishing features, calls, or behaviors did you notice?

How familiar are you with this species? Have you identified it before? How many times?

How did you rule out similar-looking species that it could be confused with?

Any additional information (malformities, numbers, sex, weather, other species that it was found with, injuries, etc.)

Observers' names, addresses, phone numbers, and e-mail addresses
